

Machine for automatic assembly and control

Business service

- Product development
- Design and construction
- integration
- commissioning

Specification

- medical
- 100% controll

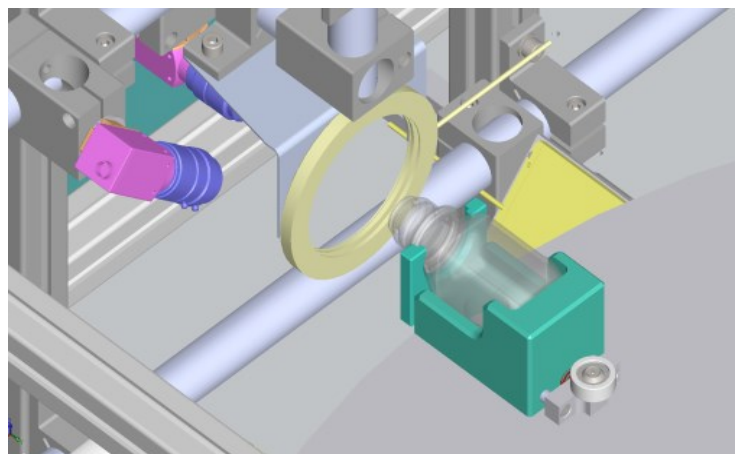

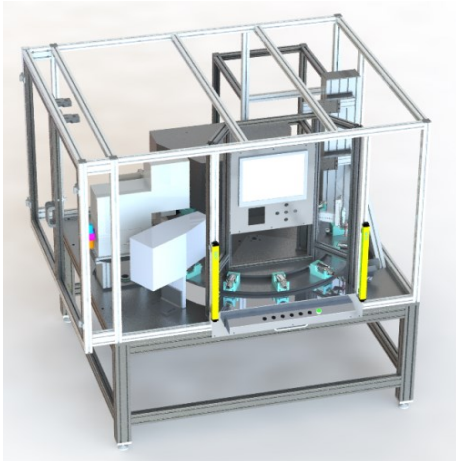

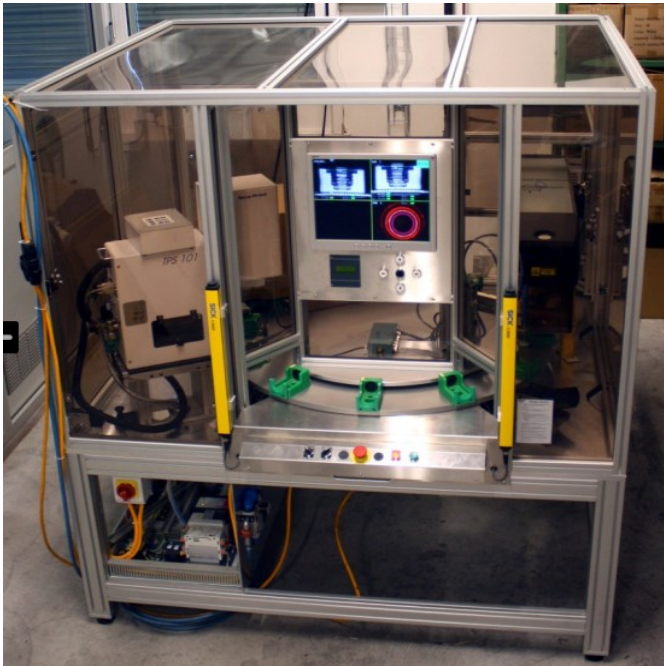

Status: start of production year 2011

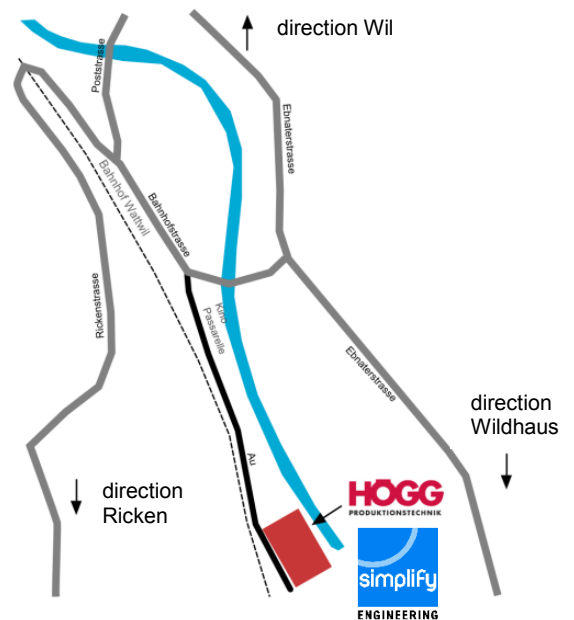

Project description

The rotary indexing machine with following process stations. Station: 1-Loading 2-degreasing, 3-tpad printing, 6-optical dimension control, 9-laser marking, 10 labeling, 11-manual removal

«simplify» solution

- Merge operations
- Combine proven machine

The **Högg Holding AG** employs around 120 employees. The **Högg AG** production technology is a provider of precise mechanical manufacturing. The **Högg Lift System AG** has a complete stair-lift program, which is installed and maintained at the individual customers. The **simplify engineering AG** develops innovative products and solutions in all sectors of industries.
