

Elevator system for railway vehicles

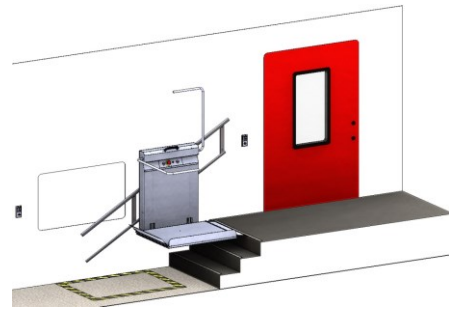

vertical lift for double deck rail vehicles

overall height	4400mm
load capacity	500kg
own weight	225 kg (nur Lift)
free door width	800mm
door clearance height	1800mm
velocity	0.1m/s
stops	3 levels

stair lift for wheelchair drivers

load capacity	225 kg
own weight	130 kg
platform	800 x 1000mm
road inclination	to 50°
velocity	0.1m/s
stops	2 levels

bistro lift for double deck rail vehicles

overall height	3400mm
load capacity	60kg
free door width	720mm
door clearance	650mm
own weight	400kg
velocity	0.1m/s
stops	2 levels

trolley lift for double deck rail vehicles

overall height	4100mm
load capacity	180kg
free door width	450mm
door clearance	1080mm
own weight	450kg
velocity	0.1m/s
stops	2 levels

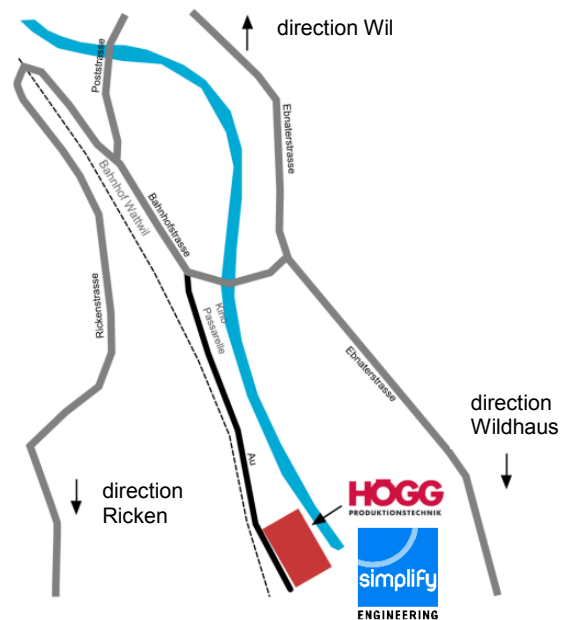

we offer following services:

- specific design of car body
- design, calculation and simulation
- welding and fabrication drawings
- engineers Manuals
- test & qualification
- installation, commissioning

according to specification:

- current, country specific TSI / PRM
- EN 45545-part
- EN 12663-1
- EN 15085
- EN 50155
- other rail and lift standards

The **Högg Holding AG** employs around 120 employees. The **Högg AG** production technology is a provider of precise mechanical manufacturing. The **Högg Lift System AG** has a complete stair-lift program, which is installed and maintained at the individual customers. The **simplify engineering AG** develops innovative products and solutions in all sectors of industries.
