

## new construction axe spindle cover

### Business service

- Mechanical engineering
- Design and construction
- integration
- commissioning

### Specification

- general Engineering

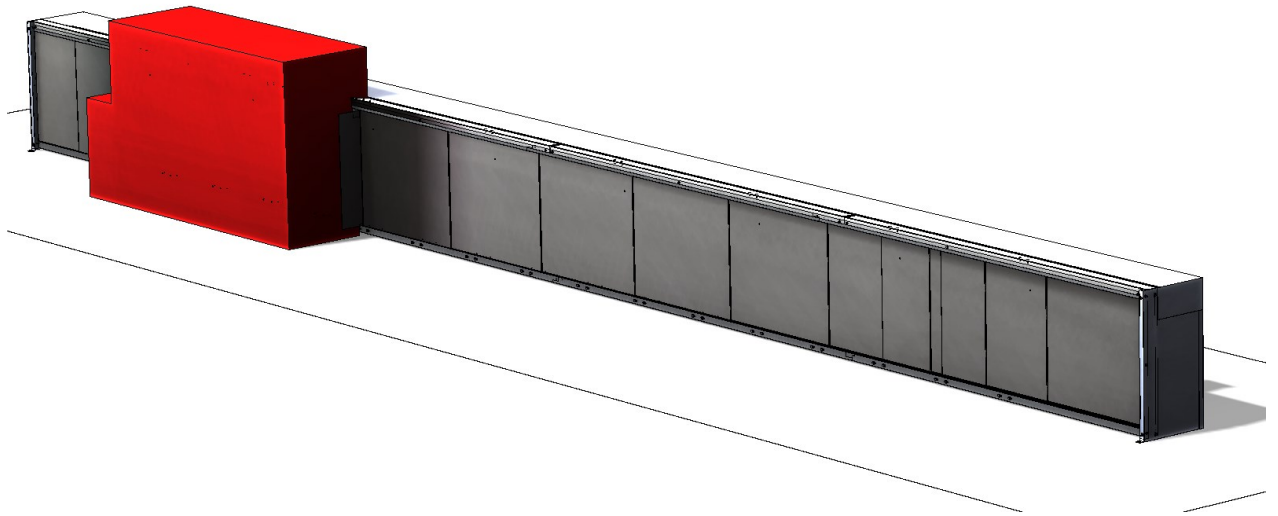

**Status:** delivered

### Project description

The milling machine has two telescopic spindle cover à each 9m stroke. These were damaged repeatedly during operation. A new design replaced the old axe spindle cover completely.

### «simplify» solution

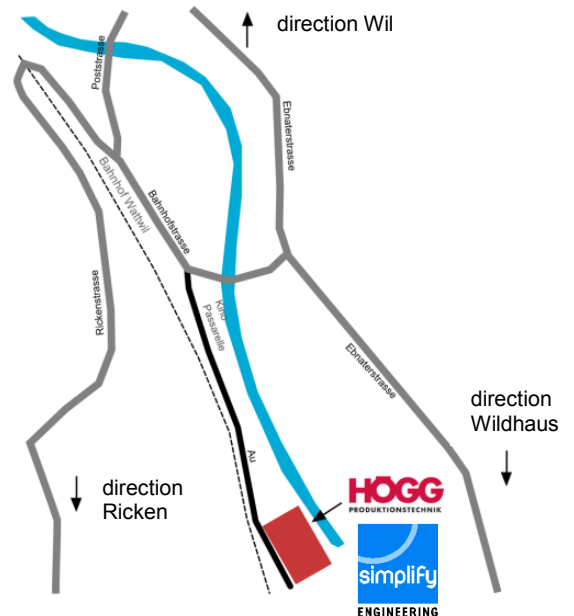

- Simple geometry as a telescopic form
- adopted simple existing technology

*new axe spindle cover*

*old axe spindle cover*

The **Högg Holding AG** employs around 120 employees. The **Högg AG** production technology is a provider of precise mechanical manufacturing. The **Högg Lift System AG** has a complete stair-lift program, which is installed and maintained at the individual customers. The **simplify engineering AG** develops innovative products and solutions in all sectors of industries.
