

Automation with a customized feeder

Business service

- design and construction
- electronics & control engineering
- assembly & integration
- installation

Specification

- 8h "unmanned" production
- fast resetting
- good accessibility
- Capacity 500'000 pcs. per year

Status: start of production year 2019

Project description

The automation was specially designed for customer-specific workpieces. The workpieces are fed as bulk material and then individually fed to the industrial robot.

«simplify» solution

- Simple solution adapted to the component
- Simple movement of the robot for the accessibility
