Railway

DG10 - Bistro lift

The bistro lift transports food and tableware from the kitchen to the on-board restaurant. This eliminates the tiring task of climbing stairs and makes it even faster for passengers to eat. The payload is limited to 80kg. A special feature is the operation of the lift doors – the doors can only be opened with one hand and the lower door wing also serves as storage space.

Simple operation

- Key switch for calling the lift
- Automatic release of the door
- Display by status LED

According to your needs

- payload 80kg
- Payload volume 750X450X600mm
- Powder coating or stainless steel

All standards fulfilled

- EN 50128
- EN 50121-3-2
- EN 50155
- EN 45545-2
- DIN 6701

The material lift enables the transport of a minibar to the upper floor of a double-decker rail vehicle. This enables the passenger to consume from his seat in comfort. The material lift is limited to 180kg payload. A special feature is the continuous cabin. This makes it possible to reach even the middle deck.

Simple operation

- Key switch for calling the lift
- Automatic release of the door
- Display by status LED

According to your needs

- payload 180kg
- Payload volume 750X1200X1500mm
- Powder coating or stainless steel

All standards fulfilled

- EN 50128
- EN 50121-3-2
- EN 50155
- EN 45545-2
- DIN 6701
